We officially launched our first semiconductor diode laser system back in 2011 in Birmingham, UK. Today's Atom series combines modern semiconductor diode laser technology with battlefield proven design and FB4 controller. Our Atoms already showed their potential in power demanding applications whilst we manage to keep the purchase costs at a reasonable level.

KVANT Atom 9 HPS is a powerful semiconductor laser system designed mainly for graphic-heavy laser applications. This robust system is built to last and it is equipped with the 90kpps Saturn 1 scanning as standard.
